OBJECTIVE

Full Stack Developer with 2 years of experience building scalable web applications using Spring Boot, Django, Next.js, and AWS. Passionate about creating efficient backend systems and intuitive front-end interfaces to deliver high-performance, user-focused solutions.

EDUCATION

M. S. Ramaiah University of Applied Sciences, Bangalore, IN 2018 – 2022
Bachelor of Technology in Computer Science CGPA: 7.3 / 10.0

Sri Chaitanya Vidya Niketan, Vizag, IN 2017 – 2018
Senior Secondary (Science - PCM) CGPA: 7.2 / 10.0

D.A.V. Public School, Godda, IN 2015 – 2016
Secondary Education CGPA: 8.0 / 10.0

SKILLS

Frontend	ReactJS, Next.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS
Backend	Python, Django, Java, SpringBoot, Node.js, RESTful APIs, Next.js
Database	PostgreSQL, MySQL, MongoDB
Tools	VS Code, Postman, Figma, Docker, Jenkins, GitHub Actions
Other	Git, Linux, AWS (EC2, S3), Docker, CI/CD, Agile Methodologies

EXPERIENCE

Global Grand Gaming Jul 2025 – Present
Full Stack Developer Bangalore, IN

- Designed and developed scalable RESTful APIs for the company's flagship sports section on Android, ensuring high performance and smooth user experience.
- Optimized backend performance using PostgreSQL and Redis caching, reducing API response times by 35% and improving scalability.
- Led a team of 5 developers, managing sprints, code reviews, and deployments to ensure quality and timely delivery.
- Collaborated with Android engineers to troubleshoot integration issues, resulting in a 25% improvement in system reliability.
- Introduced comprehensive testing and monitoring pipelines that reduced production incidents by 40%.

Artuniverse Jul 2023 – Dec 2024
Python Full Stack Developer Bangalore, IN

- Developed and maintained SaaS web applications using Django and ReactJS, ensuring cross-browser compatibility and high responsiveness.
- Implemented SEO best practices and optimized performance, driving a 30% increase in organic search traffic for client websites.
- Worked closely with product teams, testers, and scrum masters in Agile environments to deliver production-ready features on time.

- Built RESTful APIs and integrated modern front-end frameworks (React, TypeScript) to enhance user interactivity.
- Conducted internal workshops on clean coding and REST principles, improving developer efficiency by 20%.

PROJECTS

3D Property Explorer

Apr 2025 – May 2025

Built a React and Three.js-based 3D property visualization tool allowing users to explore multi-block residential buildings interactively. Implemented raycasting for flat selection, dynamic CSS2DRenderer banners, and optimized asset pipelines. Developed a Django REST backend secured with JWT and API key validation for safe data access, improving system reliability and scalability.

E-Commerce Website

Oct 2024 – Nov 2024

Developed a high-performance, SEO-optimized e-commerce platform using Next.js and React for responsive front-end design. Integrated PHP-based backend APIs for order management, secure payments, and inventory tracking. Enhanced customer experience with optimized loading times and end-to-end encryption for data protection.

Portfolio Website

Oct 2022 – Dec 2022

Created a responsive portfolio website using React, featuring modular components, smooth navigation, and modern UI with CSS-in-JS. Showcased professional projects and experience through interactive design, boosting online visibility and personal branding.

CERTIFICATIONS

NDG Linux Essentials – Cisco (Issued Sep 2023)

Networking Basics – Cisco (Issued Sep 2023)

Python Essentials 1 – Cisco (Issued Aug 2023)

Explore React.js Development – LinkedIn Learning (Issued Dec 2022)

GitHub – LinkedIn Learning (Issued Nov 2022)

Java & Python Full Stack Development & Manual Testing – KodNest (Issued 2022)
